PREFACE

The Bureau of Economic and Business Research presents the ninth edition of the Statistical Abstract of Utah, 1983.

The basic goal of this document is to bring together the data most often requested in a readily available format. During an average year, hundreds of calls and personal visits are made to the Bureau by government agencies, business firms, households, other organizations and individuals, for help in locating and interpreting data on a wide range of subjects and problems relating to the Utah economy. Beginning in 1947 with the first edition of the Statistical Abstract of Utah, the Bureau staff has tried to incorporate in succeeding editions of the publication, the data elements which the users have found most valuable.

The Statistical Abstract has been greatly enlarged over the nine editions, and the improved quality and quantity of data available reflect the increasingly complex demands of our society. The preparation of the tables is a sizable undertaking involving a large number of staff members. Ronda Brinkerhoff and Gayle Taylor have carried the major burden for the completion of this project, researching much of the updated information. Every table was checked and rechecked for its accuracy and completeness.

Many of the sections were updated by James Wood, and other researchers assisting in the data collection were Kristin Stark, Diane Gillam, Connie Wilkinson, Azar Shahabi and John Akins. Editorial supervision and production were under the direction of Mari Lou Wood, assisted by graphic arts director, James Peters, with word processing handled by Lee Carberry and Gaylene Roethel.

The Bureau is indebted to a large number of agencies and organizations for assistance: Utah Department of Employment Security, Bureau of Health Statistics, Utah Foundation, State Board of Education, Office of the Commissioner of Higher Education, Division of Family Services, Office of the Secretary of State, Department of Natural Resources, Public Service Commission and the State Department of Highways. To each of these agencies, we owe our sincere thanks and appreciation for their help and cooperation.

Suggestions from users of the Statistical Abstract of Utah, 1983 will be appreciated so that future editions can be further improved.

[a] These projections constitute the current (December, 1982) official State of Utah Baseline projections. They were produced before the severity of the 1982 national recession and its impact in the State of Utah became apparent. The projections should be interpreted as assuming that the recession will end during 1983. The projections also assume that the recession will have no permanent deleterious structural effect on the State's energy and minerals industries. The validity of these assumptions cannot be determined until a national recovery is well underway.

na - Not applicable. Towns or Cities incorporated since 1970 will not have census figures for earlier years.

CDP - Census Designated Places. These are closely settled population centers without corporate limits. In the 1970 and earlier censuses, these places were identified by "(U)," meaning "unincorporated place."

[a] Bingham Canyon Town has been disincorporated since 1970.
[b] Castle Gate Town has been disincorporated.
[c] Dragerton became East Carbon City.
[d] Granger-Hunter CDP included in West Valley City CDP for 1980.
[e] Onaqui was renamed Rush Valley.
[f] Pickleville Town was merged with Garden City.

Note: For years 1976-1977 through 1979-1980 "Expenditure per Student" equals "Total Current Expenses" divided by "Average Daily Attendance: For 1980-1981, see footnote "b" and "c" below.

[a] Includes expenditures for administration, instruction, attendance services, transportation and health services, operation of plant, maintenance of plant, and fixed charges.

[b] The expenditure per student figure is derived by dividing the total expenditures by average daily attendance.

[c] Expenditures for these districts computed under new accounting system. Includes expenditures for instruction, purchased services, supplies and materials, student support services, general administration, operation and maintenance of plant, student transportation, food services, community services, and fund transfers. Excludes capital outlay and debt services charges.

[a] Full-time equivalent is a computed statistic representing the number of full-time employees that could have been employed if all personnel were engaged on a full-time basis at the average monthly pay applying to full-time workers. It is calculated, for a particular function of a government, by dividing the average monthly pay for full-time employees of that function into the total pay for all full and part-time employees in the function.

[a] Full-time equivalent is a computed statistic representing the number of full-time employees that could have been employed if all personnel were engaged on a full-time basis at the average monthly pay applying to full-time workers. It is calculated, for a particular function of a government, by dividing the average monthly pay for full-time employees of that function into the total pay for all full- and part-time employees in the function.

[b] Includes housing and urban renewal, and air and water transportation.

[a] Pastureland included in improved land for 1945 must have been plowed within seven years. Figures for other years include land pastured which could have been plowed, but may not have been, seven years prior to the census. The figure for 1945 is therefore not strictly comparable with other censuses.

[b] Prior to 1974, the definition of a farm was based primarily on a combination of number of acres and value of agricultural products sold. In 1974 and 1978 a farm was defined to include all land on which agricultural operations were conducted and from which $1,000 or more of agricultural products were sold. Thus, 1974 and 1978 figures are not strictly comparable with those of other censuses.
